SUMMARY

Data Analyst with **1.5+ years of experience** in data analysis, reporting, and business intelligence, backed by an MSc in Data & Computational Science from UCD. Skilled in SQL, Python, Power BI, Excel, and statistical analysis, with experience translating complex datasets into actionable insights through KPI reporting, dashboards, and ad hoc analysis.

EDUCATION

University College Dublin <i>MSc in Data & Computational Science – Grade: 2:1</i>	Dublin, Ireland 2024 – 2025
Vidyalankar Institute of Technology <i>Bachelor of Engineering in Electronics – Grade: 1:1</i>	Mumbai, India 2019 – 2023

TECHNICAL SKILLS

Languages & Querying: SQL (MySQL, PostgreSQL), Python, R
BI & Visualisation: Power BI, Tableau, Excel (Pivot Tables, VLOOKUP), Google Sheets, SAS
Analytics: Data Analysis, Data Storytelling, Ad Hoc Analysis, KPI Reporting, EDA, Statistical Analysis, ETL, Data Quality
Tools & Platforms: Git, GitHub, Microsoft Azure, Jira, SharePoint, FastAPI, Terraform, CRM Reporting

EXPERIENCE

Operations Customer Expert <i>Teleperformance</i>	May 2026 – Present Dublin, Ireland
– Analyse and process 100+ weekly operational cases using CRM records, identifying recurring issues, exceptions, and process trends to support accurate and timely resolution. – Monitor operational data, quality metrics, and error trends to support reporting and process improvements, maintaining audit-ready records and achieving 11 QMS assessments at 100%.	
Sales & Business Operations Intern (Data & Analytics Focus) <i>Heart Rhythm International</i>	Oct 2025 – Mar 2026 Dublin, Ireland
– Queried and analysed healthcare and sales datasets using SQL and Python, delivering weekly KPI reports on pipeline performance, customer activity, and revenue trends for senior stakeholders. – Designed and maintained Power BI and Google Sheets dashboards tracking 5+ business metrics; supported CRM reporting and ad hoc analysis requests from cross-functional teams.	
Associate <i>SBI Life Insurance Pvt. Ltd.</i>	Jul 2023 – Jul 2024 Mumbai, India
– Analysed 50+ daily operational records using Excel and SQL to identify data quality issues, trends, and anomalies, supporting accurate reporting and business decision-making. – Prepared recurring KPI reports, dashboards, and data summaries for stakeholders, improving visibility into operational performance and enabling timely follow-up on exceptions.	
Data Analyst Intern <i>Autobot Dynamics</i>	Jul 2021 – Oct 2021 Mumbai, India
– Extracted and cleaned 10K+ records using SQL and Excel; performed EDA and built stakeholder reports that surfaced actionable trends and performance anomalies.	

PROJECTS

E-Commerce Sales Dashboard <i>Power BI, KPI Reporting</i> 🐙 GitHub	
– Built an interactive business intelligence dashboard tracking revenue, profit, and order value across customer segments; surfaced top revenue drivers and underperforming categories through data storytelling visualisations.	
Credit Card Fraud Detection <i>Python, Scikit-learn, Statistical Analysis</i> 🐙 GitHub	
– Performed EDA and feature analysis on 280K+ transaction records to detect fraud patterns; trained classification models achieving 93% accuracy, validated via precision, recall, and F1-score.	
EPL Monte Carlo Simulation <i>Python, Elo Rating, Poisson Model</i> 🐙 GitHub	
– Developed a statistical simulation model using Elo ratings and Poisson distributions across 380+ matches to forecast EPL outcomes, league rankings, and season performance scenarios.	

CERTIFICATIONS

Google Data Analytics Professional Certificate – Google <i>Data analysis, SQL, R, Tableau, data storytelling</i>	2025
Python 101 for Data Science – IBM <i>Python, pandas, data manipulation</i>	2024
